### Workshop Description

Starting with the pointed pen, students will begin exploring the basic strokes and lowercase letters from the traditional copperplate hand. We will then move on to some exercises that break the rules of the traditional to give us the more modern, playful look. On the second day, we will try the pointed brush and begin writing quotes in small compositions, using color and other inks.

This online Zoom class with full interaction with the instructor during class time. If possible, students should have two devices available so the instructor can see faces and work surfaces. A Zoom link will be sent to all participants a few days before the workshop. If you haven't used Zoom yet, we will have a tech session offered before the workshop to show you how to use it. This workshop will be recorded and participants will be sent a link afterward to access online anytime.
